

quickmolding

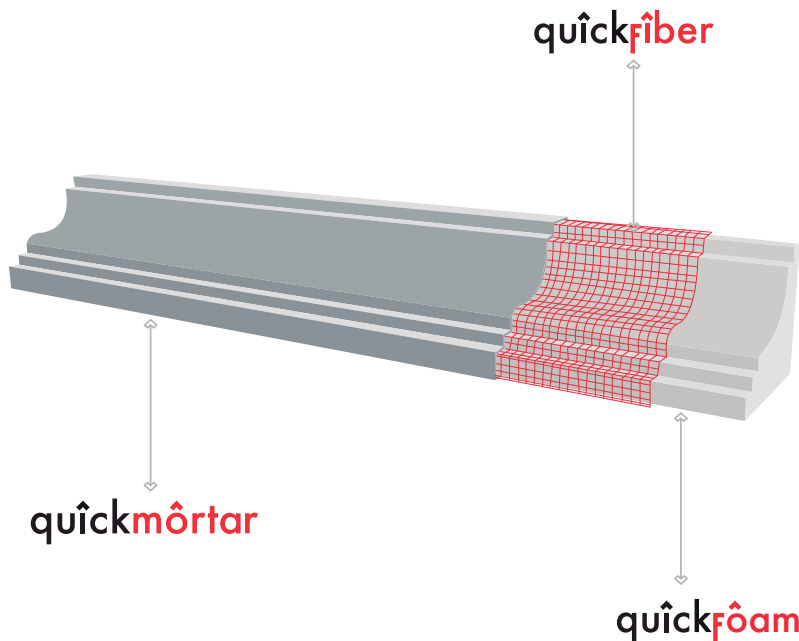

Get an excellent
final finish and
decorative in very
short time.

quickmolding is a product born to solve with ease the constructive details both in modern architecture and in traditional architecture, avoiding some problems that were usually created during construction with the use of traditional products.

The base material of which quickmolding is composed is EPS (expanded polystyrene) and XPS (extruded polystyrene) of high density material well known for its excellent insulating properties that gives it the required volume with reduced weights.

quickmolding It is presented with a surface finish in elastomeric mortar if you want to have an aesthetic behavior similar to stone, concrete, classic paints, etc.

Advantage.

- ◇ Wide range of designs.
- ◇ Strength before the climatic changes.
- ◇ Adaptation to different systems.
- ◇ Resistance and lightness.
- ◇ Custom designs.
- ◇ A fi nity with different finishes.
- ◇ Stability and low cost.
- ◇ Easy installation.
